Nicole Joller - Publications

Anderson AC, Joller N, Kuchroo VK
Lag-3, Tim-3, and TIGIT co-inhibitory receptors with specialized functions in immune regulation.
Immunity, 2016 May 17;44(5):989-1004

CD5L/AIM Regulates Lipid Biosynthesis and Restrains Th17 Cell Pathogenicity.
Cell, 2015 Dec 3;163(6):1413-27

TIGIT predominantly regulates the immune response via regulatory T cells.
Journal of Clinical Investigation, 2015 Nov 2;125(11):4053-62

MicroRNA-21 promotes Th17 differentiation and mediates experimental autoimmune encephalomyelitis.

Treg cells expressing the coinhibitory molecule TIGIT selectively inhibit proinflammatory Th1 and Th17 cell responses.

Joller N, Kuchroo VK
Good guys gone bad: exTreg cells promote autoimmune arthritis.

Lozano E, Joller N, Coa Y, Kuchroo VK, Hafler DA
The CD226/CD155 Interaction Regulates the Proinflammatory (Th1/Th17)/Anti-Inflammatory (Th2) Balance in Humans.
Journal of Immunology, 2013 Oct 1;191(7):3673-80

Sutherland APR, Joller N, Michaud M, Liu SM, Kuchroo VK, Grusby MJ
IL-21 promotes CD8⁺ CTL activity via the transcription factor T-bet.
Journal of Immunology, 2013 Apr 15;190(8):3977-84

Weber SS, Joller N, Oxenius A
Assessment of Legionella-specific immunity in mice.
Methods in Molecular Biology, 2013;954:505-20

IFN-γ limits Th9 mediated autoimmune inflammation through dendritic cell modulation of IL-27.
Journal of Immunology, 2012 Dec 1;189(11):5277-83

Joller N, Peters A, Anderson AC, Kuchroo VK
Immune checkpoints in central nervous system autoimmunity.

Identification of protective B cell antigens of Legionella pneumophila.
Journal of Immunology, 2012 Jul 15;189(2):841-9

Wiesel M, Crouse J, Bedenikovic G, Sutherland APR, Joller N, Oxenius A
Type-1 IFN drives the differentiation of short-lived effector CD8⁺ T cells.
European Journal of Immunology, 2012 Feb;42(2):320-9

Murugaiyan G, Beynon V, Mittal A, Joller N, Weiner HL
Silencing MicroRNA-155 Ameliorates Experimental Autoimmune Enecephalomyelitis.
Journal of Immunology, 2011 Sep 1;187(5):2213-21

Joller N, Weber SS, Oxenius A
Antibody - Fc receptor interactions in protection against intracellular pathogens.

Cutting edge: TIGIT has T cell-intrinsic inhibitory functions.
Journal of Immunology (Cutting Edge), 2011 Feb 1;186(3):1338-42.

Antibodies protect against intracellular bacteria by Fc receptor-mediated lysosomal targeting².

²This publication was awarded with the Pfizer Forschungspreis 2012
Wiesel M, Joller N, Ehlert AK, Crouse J, Spörr R, Bachmann MF, Oxenius A
*T helper cells act via two synergistic pathways to promote antiviral CD8+ T cell responses.*
Journal of Immunology, 2010 Nov 1;185(9):5188-97.

Apetoh L*, Quintana FJ*, Pot C*, Joller N, Xiao S, Kumar D, Burns EJ, Sherr DH, Weiner HL, Kuchroo VK
*The aryl hydrocarbon receptor interacts with c-Maf to promote the differentiation of type 1 regulatory T cells induced by IL-27.*
Nature Immunology, 2010 Sep; 11(9):854-61.

Spörri R, Joller N, Hilbi H, Oxenius A
*A novel role for neutrophils as critical cytokine producers in microbial infection.*

Joller N, Spörri R, Hilbi H and Oxenius A
*Induction and protective role of antibodies in Legionella pneumophila infection.*

Spörri R, Joller N, Albers U, Hilbi H, Oxenius A
*MyD88-dependent IFN-gamma production by NK cells is key for control of Legionella pneumophila infection.*
Journal of Immunology, 2006 May 15;176(10):6162-71.
